POS Displays

IEE offers the most current display and display interface technologies available to satisfy any POS requirement.

VFD Pole Displays
Powered through a serial interface or USB, our VFD displays save space and simplify installation. They replace many OEM-supplied products, including Epson, IBM, Logic Controls, PartnerTech and Ultimate.

VFD Graphic Pole Displays
These displays incorporate multiple language fonts and feature crisp, bright text and graphics.

LCD Pole Displays
IEE's monochrome and color LCD displays use less power, have wide viewing angles, are sunlight readable and offer outstanding service life. Extended language sets available (including complex Asian characters). Color versions support graphics and image display.

Custom Display Mounts
Standard kits containing the filter, housing, power supply and mounting options convert all our POS displays to either countertop or customer facing configurations.

Why Choose IEE Solutions?

IEE specializes in developing, designing and manufacturing durable electronic displays. Whether you need an off-the-shelf or customized solution, we have a product to meet your specific needs.

Quality in Every Product
By controlling the entire process from concept to delivery, we can ensure the highest levels of quality in our products.

Flexible, Customized Solutions
Choose just the features you want to fit your customer's needs

Long Term Support
We don't abandon our products or our customers. This means when you need replacement support for the models you've purchased, we've got you covered.

Ease of Integration
We select hardware that is plug and play compatible with your POS systems. And when you need help, we're only a phone call away.

Rapid Prototyping
Our state-of-the-art development, testing and manufacturing facility means quick turnaround for your customized product

Competitive and Cost-Effective
Whether you need just simple bar code scanning or more advanced interactive applications, IEE has a product to fit your needs and budget.
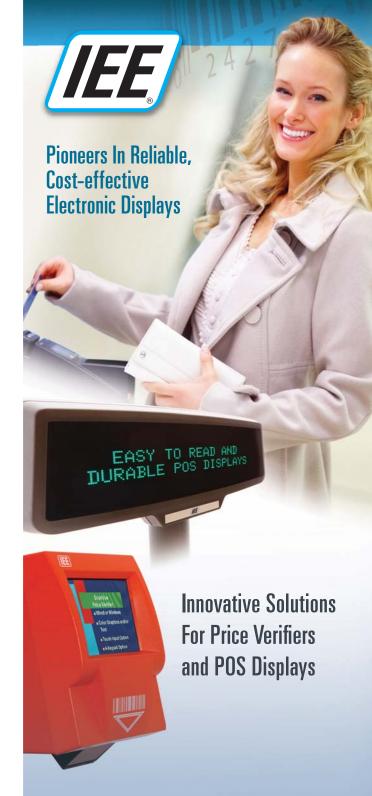

Certification standards include:
- ISO 9001:2008
- Certifications: NRTL, UL, FCC, uTUVus, CSA and CE

Pioneers In Reliable, Cost-effective Electronic Displays

EASY TO READ AND DURABLE POS DISPLAYS

Innovative Solutions For Price Verifiers and POS Displays

Our Reputation Precedes Us

IEE®

IEE's legacy began in 1946 with the company developing and manufacturing cutting edge military displays for United States government aircraft, naval and land vehicles.

Today we remain a leader in safety-critical military displays, and have successfully applied this expertise to our POS products and outdoor kiosk displays.

Our POS products are reliable, durable and designed specifically to provide cost-effective solutions for the retail environment. IEE product can be found in major grocery and retail chains across the U.S., Europe, Latin America and the Far East.

With design, manufacturing and test facilities housed in our Van Nuys, California headquarters, IEE specializes in rapid prototyping, and can quickly create custom solutions to fit your customer's needs.

Price Verifiers

We know price checkers. With over 65 years of experience in designing electronic displays, we know how to build a tough, reliable product. We pioneered one of the industry's first price verifiers, so we understand what the retailer needs.

ScanVue™ LCD

This best-selling price verifier has a modular design that lets you configure the device to meet your exact requirements. It's thin-client/browser based design, powerful ARM processor and QVGA display makes it easy to develop applications that deliver video content and customized messages to the sales floor.

ScanVue™ VFD

Our value-priced verifier delivers fast bar code scanning combined with a bright, easy to read text display. The high contrast, wide viewing angle vacuum florescent panel displays up to four lines of text, allowing the retailer to deliver product descriptions and promotional messages along with pricing information. This is the ideal device for bar code scanning where cost is the primary concern.

Key Features:
- 5.7" QVGA display
- 1D or 2D scanner
- Touch screen or keypad interface
- Wired (Ethernet) or wireless (802.11)
- USB 2.0; RS-232 connections
- Custom colors available
- Embedded Linux OS
- Optional external serial printer
- Optional magnetic stripe reader

Key Features
- High contrast 4×20 5mm VFD
- Powered by DC adapter or power over Ethernet
- Custom colors available
- Embedded Linux OS
- Optional four function push button switches
- Optional external serial printer
- Optional magnetic stripe reader

All ScanVue products meet price-checker requirements to qualify for waivers from local item pricing laws.
